

2023 MISSOURI SOYBEAN TEST

The MU Variety Testing Program is accepting soybean variety entries into the Official Missouri Variety Trials. The soybean production area in Missouri has been divided into four regions. All soybean varieties will be tested in a single experiment at each of our locations. They will, however, be subdivided by Maturity Group. There are five soybean locations in the North, Central, and Southeast Regions and four locations in the Southwest Region. All soybean locations will have low to moderate SCN levels in the soil. Every possible effort will be made to plant, harvest, and report data for each entry accepted. However, no refund of testing fees will be made for data lost due to circumstances beyond our control. Entries will be tested only in the maturity group range of that particular soybean line. Please provide characteristics for each variety. We will post a list of all varieties tested along with their characteristics online.

Please note that although we encourage entries with the most recent herbicide resistance traits, we will treat all entries the same in regards to post-emergence weed control.

A variety may be entered in as many regions as desired, but within a region the variety must be tested at all locations. Planting rate will be 160,000 seeds/acre for all tests. Please send **8 pounds** of seed for each entry for each region and **include SDS sheets for any seed treatment applied.**

The fee schedule for the soybean tests will be **\$125** per entry per location, or **\$625** for the North, Central, and Southeast regions and **\$500** for the Southwest region. The deadline for application is **March 1** and the deadline for seed is **March 15**. We have extended the payment deadline to **April 1**. Please make checks payable to: **UNIVERSITY OF MISSOURI**

Locations for the North Region:

(1) Albany, (2) Canton, (3) Rock Port, (4) Mooresville, (5) Novelty

Locations for the Central Region:

(6) Columbia, (7) Vandalia, (8) Henrietta, (9) Norborne, (10) Truxton

Locations for the Southwest Region:

(11) Springfield, (12) Garden City, (13) Lamar, (14) Urich

Locations for the Southeast Region:

(15) Charleston, (16) Dexter, (17) Campbell, (18) Fisk, (19) Portageville

Our contact information and address for shipping seed is:
